SMART, SMALL & GREEN DIRECT-TO-TV SOLUTION FOR PAY-TV

GREEN

- Small, lightweight & low power consumption.
- Plug & Play with no additional cable and remote control unit.
- **Once installed, you forget it's there!**

SECURE

- Cutting-edge anti-piracy security implemented.
- The latest CAS or DRM technologies supported according to your own request.
- **For a seamless move from Broadcast to Broadband services.**

RELIABLE

- Easy setup with no support needed and close to zero return.
- Proven capacity & process at each step: specs, validation, printing, production and delivery.
- **High-Quality guarantee.**

UNIVERSAL DEVICE

A simple and small hardware device that once directly plugged into a TV enables:

- Any video descrambling: SD, HD or UHD channels
- Any reception mode: Satellite (DVB-S/S2), Terrestrial (DVB-T/T2) or Cable (DVB-C/C2)
- Multi-languages configuration: 20+
- Standard or Custom Parental Control and PIN management

FIGHT AGAINST PIRACY

Our next CI+ 1.4 CAM generation ensures you the right level of security to deal with content protection:

- Being DVB- CI+ 1.4 compliant
- Integrating top tier CAS technologies
- Implementing ECP and CI+ Revocation
- Supporting suitable Watermarking technology

ENHANCED USER EXPERIENCE

A CAM combined with an HbbTV OpApp compliant TV model, allows you to take control over TV UI as well as STB can do, even in non-connected environment, with:

- An easy and smart installation: no extra RCU, no Input selection, the CAM becomes the trigger
- A persistent application as an external source
- Interoperable across all new TV brands (2019+)

A RICH CATALOGUE
